1. INTRODUCTION

The 3G-SDI Matrix series allows SD-SDI, HD-SDI and 3G-SDI signals to be shown on SDI displays while ensuring high bit-rates of 2.970 Gbps to give fast signal transmission without signal loss. The PRO-SDI164 allows 16 3G-SDI sources to be switched between 4 SDI equipped displays to distances of up to 300m. Additionally, LPCM Multi-channel and LPCM stereo audio signals are supported. Control of the matrix is via the supplied IR remote, the front panel keys, or RS-232 control functions.

2. APPLICATIONS

-  Video broadcasting switching display
-  Professional video program display
-  Film studios program monitoring
-  Video program switching display
